

# CS160 Heuristic Evaluation Assignment

## Grading Guidelines (20 points total)

### Problem (1 point, 1 sentence)

One point is awarded for the problem statement, which, as the assignment handout indicated, is a one-sentence description of the interface that you were evaluating. We also accepted a one-sentence description of the problem that the interface addresses as the problem statement.

### Violations Found (13 points, as needed)

We awarded 13 points as follow:

- 3 point – clarity of violation descriptions
- 7 point – validity of violations and severity ratings assigned
- 3 point – completeness of violations in terms of coverage of the presented interface design

### Summary of Violations (3 points, 1 paragraph)

We awarded 3 points as follow:

- 1 point – number of violations found in each of the ten heuristic categories
- 1 point – total number of violations found in entire interface
- 1 point – total number of violations in each severity category

This section is essentially a freebie.

### Recommendations (3 points, ~ 1/2 page)

We awarded 3 points for the quality of overall recommendations.
