CS 61B Lab 13
April 19-21, 2000

Show your TA or lab assistant your progress on Project 3. You may use the rest of the lab to work on your project. When your TA is finished with check-offs, you may use this as an opportunity to ask the TA or lab assistant any questions you have about the project.

If you wish to continue working when your lab time ends, please move to 275 Soda (unless yours is the last lab of the day).

Check-off
---

4 points: Show that WUGTest.java is assigning you some of the autogradable points. You'll receive twice as many points for the lab as WUGTest assigns you, up to a maximum of 4.

If your code for inserting, removing, identifying, and counting vertices is working correctly (even if you haven't implemented edges yet), WUGTest will assign you two points, so you'll get four points for the lab.
